CAREER OBJECTIVE

Full Stack Developer with hands-on experience building and deploying multiple production-ready web applications using Next.js, Express.js, TypeScript and MongoDB — from REST APIs and authentication systems to responsive, modern UI with Tailwind CSS. Currently pursuing a B.Sc. in CSE while independently shipping full-stack projects end-to-end. Looking to join a collaborative team to contribute clean, scalable code and keep growing as a full stack developer.

SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js 15

Backend & Database: Node.js, Express.js, MongoDB (Native Driver & Mongoose), REST API Design

Auth & Security: JWT, Google OAuth, bcryptjs, Zod Validation, Role-Based Access Control

AI Integration: OpenAI API (recommendation engines, streaming chat features)

Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel

Soft Skills: Problem Solving, Self-Learning, Deadline Ownership, Technical Documentation

PASSION & INTEREST

- Building full-stack web applications end-to-end — from database design and REST APIs to polished, responsive user interfaces.
- Exploring AI integration in web products, including recommendation engines and streaming chat features with the OpenAI API.
- Writing clean, scalable and well-documented code while keeping up with the modern JavaScript and TypeScript ecosystem.
- Turning real-world problems into practical products and growing continuously through self-learning and project-based practice.

PROJECTS

PlanMyWedding — AI-Powered Wedding Platform

[Live](#) | Client: [GitHub](#) | Server: [GitHub](#)

Stack: Next.js, Express.js, TypeScript, MongoDB (Mongoose), JWT, Google OAuth, Zod, OpenAI API

- Built a full-stack wedding planning platform with vendor listings, booking and review systems.
- Implemented Google OAuth and JWT authentication with a single consolidated entry-point architecture.
- Integrated OpenAI-powered modules for personalized vendor recommendations and a live streaming AI chat assistant.

Property Rental — Property Booking Platform

[Live](#) | Client: [GitHub](#) | Server: [GitHub](#)

Stack: Next.js, TypeScript, Express.js, MongoDB

- Developed a property rental platform with search/filter functionality and a full booking flow.
- Built REST APIs with Express.js and MongoDB to manage listings, availability and reservations.
- Delivered a fully responsive UI with Tailwind CSS across mobile, tablet and desktop.

DocAppoint — Doctor Appointment Platform

[Live](#) | Client: [GitHub](#) | Server: [GitHub](#)

Stack: Next.js, Express.js, MongoDB, JWT

- Built a patient-doctor appointment system with scheduling, profile management and protected routes.
- Secured the app with JWT-based authentication and role-based access for patients and doctors.
- Delivered a responsive Next.js UI for real-time appointment booking and management.

EDUCATION

B.Sc. in Computer Science & Engineering (Ongoing, 3rd Semester)

Mohammadpur Central University

LANGUAGE PROFICIENCY

Bengali — Native | English — Professional Working Proficiency
