

CAREER OBJECTIVE

Junior Full Stack Developer with hands-on experience building and deploying multiple production-ready web applications using Next.js, Express.js, TypeScript and MongoDB. Comfortable working across the stack — from REST APIs and authentication systems to responsive, modern UI with Tailwind CSS. Currently pursuing a B.Sc. in CSE while independently shipping full-stack projects end-to-end. Looking to join a collaborative team to contribute clean, scalable code and keep growing as a full stack developer.

SKILLS

- Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js 15
- Backend & Database: Node.js, Express.js, MongoDB (Native Driver & Mongoose), REST API Design
- Auth & Security: JWT, Google OAuth, bcryptjs, Zod Validation, Role-Based Access Control
- AI Integration: OpenAI API (recommendation engines, streaming chat features)
- Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel
- Soft Skills: Problem Solving, Self-Learning, Deadline Ownership, Technical Documentation

PRACTICAL EXPERIENCE

MERN Stack Developer Trainee — Programming Hero / Self-Led Projects

Remote / Self-paced · Dhaka, Bangladesh

Jan 2026 - Present

- Completed 800+ hours of hands-on, project-based training in JavaScript, React, Next.js, Node.js, Express.js and MongoDB.
- Learned and practiced authentication, API integration, deployment, debugging and proper Git workflow.
- Built and deployed 4+ full-stack projects with mobile-first responsive design, reusable components, protected routes, REST API integration and version-controlled Git commits.
- Used AI tools (ChatGPT, GitHub Copilot, Cursor) to speed up requirement breakdown, bug tracing, code refactoring and documentation — while manually reviewing and testing every piece of generated code before use.

PROJECTS

PlanMyWedding — AI-Powered Wedding Planning Platform

Live GitHub Repo

Stack: Express.js, TypeScript, MongoDB (Mongoose), JWT, Google OAuth, Zod, OpenAI API

- Built a full-stack wedding planning platform with vendor listings, booking and review systems.
- Implemented Google OAuth and JWT authentication with a single consolidated src/index.ts entry point architecture.
- Integrated OpenAI-powered modules for personalized vendor recommendations and a live streaming AI chat assistant.
- Applied Zod schema validation and bcryptjs for secure, type-safe request handling.

Property Rental — Property Listing & Booking Platform

Live GitHub Repo

Stack: Next.js, TypeScript, Express.js, MongoDB

- Developed a property rental platform with search/filter functionality and a full booking flow.
- Built REST APIs with Express.js and MongoDB to manage listings, availability and reservations.
- Delivered a fully responsive UI with Tailwind CSS across mobile, tablet and desktop.

DocAppoint — Doctor Appointment Booking System

Live GitHub Repo

Stack: Next.js, Express.js, MongoDB, JWT

- Built a patient-doctor appointment system with scheduling, profile management and protected routes.
- Secured the app with JWT-based authentication and role-based access for patients and doctors.

Summer Store — E-commerce Web Application

Live GitHub Repo

Stack: Next.js, Tailwind CSS, Express.js, MongoDB

- Built an e-commerce storefront with product catalog, cart and checkout flow.
- Implemented a native MongoDB driver backend (no Mongoose) for a lightweight, direct data layer.

EDUCATION

- B.Sc. in Computer Science & Engineering (Ongoing, 3rd Semester)
- Mohammadpur Central University
- Higher Secondary Certificate (HSC), Science — GPA 4.58/5 (2020)
- Begum Sheikh Fazilatunnessa Mujib Govt. College
- Secondary School Certificate (SSC), Science — GPA 4.58/5 (2018)
- West Dhanmondi Yusuf High School

LANGUAGES

Bengali — Native | English — Professional Working Proficiency
